

FOR ALL YOU  
HAVEN'T DONE,  
THANK  
YOU.

You didn't go out. You didn't shake hands. You took turns on the elevator and postponed your plans. And in the course of making those sacrifices in your life, you may have saved dozens of others like mine.

Coronavirus can infect any of us. But older adults are most likely to die from it.

So by taking precautions to keep yourself and your family safe, you are protecting all of us. And for that, we can't thank you enough.
